# APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY
First Semester MCA Regular Practical Examination April 2021
Course Code: 20MCA133 Course Name: WEB PROGRAMMING LAB

1. Create an html file and linked stylesheet.
2. Add a div to the page. Give it a class of header.
3. Give the header div a width of 800px and a height of 150px in your stylesheet. Give it a border.
4. Declare your header div position:relative. This will reset the origin for all absolutely positioned elements within it.
5. Put three divs inside your header. Give them classes of logo, top-nav and menu.
6. Position them appropriately using CSS and absolute positioning to create the following, useful, real world layout.

Program:

Web_exam.html:

```html
<html>
  <head>
    <title>WEB LAB EXAM</title>
    <link rel="stylesheet" href="web.css">
  </head>
  <body>
    <div class="header">
      <div class="logo">
        <img src="admin logo .png" id="ig">
      </div>
      <div class="top-nav">

      </div>
      <div class="menu">
        <h3>MENU</h2>

      </div>

    </div>
  </body>
</html>
```

Web.css:

```css
.header
{
    width: 800px;
    height: 150px;
    border: 5px;
    border-style: double;
    border-color: black;
    position: relative;
}
#ig
{
    height: 80px;
    width: 80px;
    position: absolute;
}
.top-nav
{
    margin-left: 40%;
    background-color: gray;
    height: 60px;
    width: 60%;
}
.menu
{
```

```
    text-align: left;

    margin-left: 40%;

    padding-right: 10px;

    background-color: lightgray;

}
```

Output:
